Applied For

Technical Assessment

Technical Summary

The assistant demonstrated acceptable knowledge on MERN stack technologies, including an overview of MongoDB, Express.js, React.js, and Node.js. However, deeper explanations of the development process for beginners were lacking. The language used was sometimes described as 'triad'. Overall, the technical proficiency is average with room for improvement in presentation.

Soft-skill Assessment

Soft-skill Summary

The assistant exhibited strong communication skills, being polite and informative, enthusiastic, and willing to provide connected information, which showed the assistant's ability to engage effectively. The responses were clear and concise, though some could be more structured to effectively convey the information. The enthusiasm was presented could have been more professional. Overall, the soft skills are strong.
